

三个思维层次

Three Levels of Thinking

2021.01.22

Poker player's thinking

- 1st level: 我有什么牌? what cards do I have?
- 2nd level: 他们有什么牌? what cards do they have?
- 3rd level: 他们认为我有什么牌? what do they think what cards I have?
- 4th level: 他们认为我认为他们有什么牌? what do they think what I think what cards they have?
- 5th level:

思维的第一层级

the first level of thinking

- Focus on observations, but seldom explain or analyze what I see
- Almost everyone can do it
- Used to looking for evidence to support my idea and persist, but never doubt or object my own idea

思维的第二层级

the second level of thinking

- Attempt to explain my observations and attempt to associate pieces
- Require a lot of work
- Stitch observation segments together, and find new meanings (e.g. LEGO)
- Compare various ways and find room for improvement

思维的第三层级

the third level of thinking

- Treat ideas from difference perspectives, and achieve more comprehensive understanding
- Transplant knowledge into difference scenario
- **Not only ask why, but also give novel solutions**
- Imaginary idea, unique perspective and innovative strategy

- Stuck in observations
- Find meanings
- Change routine
